<b>5 28</b>		<b>1560 1556</b>	
08:40-09:25		Induction and restriction of derived equivalences	
09:30-10:15		Homological theory of orthogonal modules over algebras	
10:15-10:35			
10:35-11:20		Huppert's - conjecture	
11:25-12:10		A class of quasi-classical groups over finite fields	
<b>5 28</b>		<b>1560 1556</b>	
14:00-14:45		On Oliver's $p$ -group conjecture for Sylow subgroups of symplectic groups and orthogonal groups	
14:50-15:35		Local rank of fusion systems and Alperin's weight conjecture	
15:35-15:55			
15:55-16:40		TBA	
16:45-17:30		Tensor factorizations of characters (revisited)
